

6S High Precision Battery Monitor Met-6

Features:

1. Power battery for remote control model and receiver battery voltage and better level measurement;
2. Accurate display of 2 ~ 6 cells Li-ion battery separate voltage and total voltage or 4 ~ 20 cells NiMH / NiCd total voltage;
3. 43mmX25mm big screen 128 * 64 dot matrix LCD. One screen can display all battery information include each separate cell voltage, total voltage Σ , maximum voltage difference Δ .
4. Display the electrical quantity.
5. Display the current environment temperature.
6. Reverse polarity protection.
